

PM10-2.5-SS

PM10-2.5-SS Combination PM10 and PM2.5 Cyclone and Nozzle Set

METHODS

M201A

Each PM10-25-SS combination set includes a PM10 cyclone, 12 PM10 nozzles, a 47mm filter assembly, a PM2.5 cyclone, the cascade adapter linking device and full assembly. Also included is a modular S type Pitot tip, support brace, and O-rings.

FEATURES

The draft method for determination of PM10 and PM2.5 specifies the procedure for simultaneous in-stack segregation of particulate matter greater than PM10, equal to or less than PM10 but greater than PM2.5, and equal to or less than PM2.5. The particulate matter is recovered from three clearly defined zones within the dual cyclone assembly.
